TRADITIONAL FIBROUS PLASTER

BESPOKE SERVICE

Blenheim Fine Interiors Limited work with many kinds of clients including architects, interior designers, specialist contractors and property developers.

We are often required to develop bespoke plasterwork designs and in each case we consult with our clients to deliver their project specific requirements. An array of bespoke cornice, ceiling centres, plaques, columns, capitals and other architectural embellishments both plain & enriched can be produced.

We are also able to match existing fibrous plasterwork on refurbishment and renovation projects, using the skills of our fibrous plasterers on site to take squeeze moulds and references to ensure existing enrichments are faithfully reproduced.

MODELS & MOULDS

Our skilled sculptors and technicians produce detailed and intricate models from plaster, with enrichments carefully hand crafted in wax or clay, reproducing bespoke designs in three dimensions with a high degree of relief and sharpness. Once the model is complete we often seek the approval of our client prior to mould making.

We produce our moulds from a wide range of materials including silicone rubber, plaster and GRP and it is from these moulds that the fibrous plaster casts are produced using traditional techniques and materials.

FIXING

Our experienced installation teams use traditional methods to fix a variety of fibrous plaster elements.

From a simple cornice to an enriched ceiling, care is always taken to ensure that the best method is utilised. Our fixers are highly skilled and ensure that the high quality achieved in the workshop, is maintained in the finished installation.

STANDARD RANGE

We also offer a standard range of cornices in a variety of sizes to suit different room settings and ceiling heights.

A selection of plain, egg and dart, dentil and leaf designs are available.

A further range of ceiling centres to complement our cornice designs is also available. Our exclusive designs are produced to the same exacting standards as our bespoke items.

Further details of our off the shelf items are provided on separate data sheets which are available upon request.
