# VENETIAN POLISHED PLASTER

## THE PRODUCT

Blenheim Fine Interiors Limited specialise in the application of Venetian Polished Plaster, a luxurious decorative surface finish originating in Italy using age old techniques derived from the Renaissance period.

Polished Plaster, whilst impressive in its own right, is often specified by architects and interior designers as a cost effective alternative to stone and marble. We are able to offer our clients a vast array of colours, textures and finishes, which are hand applied by our highly skilled craftsmen who can create truly unique and stunning effects.

Polished Plaster can be applied to straight and curved walls, ceilings and columns casings.

Only the finest quality organic materials including lime, ground marble and other natural ingredients sourced from Italy are used. Our materials contain no synthetic additives, impurities or fillers.

## STANDARD FINISHES

*Marmorino*: This highly polished completely smooth surface gives the appearance of marble with soft shades of colour.

*Marmorino Fine*: Similar in appearance to Marmorino with a silky softer appearance.

*Grassello*: Smooth and highly polished with a semi-transparent surface, Grassello provides tonal variations and movement.

*Texturro*: Providing a pitted textured finish not unlike honed stone with a less shiny appearance.

*Travertino*: As its name suggests, Travertino has the directional texture of natural travertine with a low sheen.

*Striato*: A directional rugged, textured finish not dissimilar to weathered stone with a medium sheen.

The above finishes are available in colours from our standard range or bespoke colours can be created to suit your specific project needs.

## CUSTOM EFFECTS

Company logos and corporate identities can be replicated in Polished Plaster using a number of different techniques. Designs can be recessed or embossed giving both depth and a striking three dimensional appearance.

Further techniques can be employed to create banding, faux stone and panelling effects in varying colours to create stunning bespoke designs.

## PERFORMANCE

Polished Plaster is durable, hardwearing and requires little maintenance. Found in all types of premises including hotels, shopping malls and offices, Polished Plaster can be used in a number of environments including swimming pools, health clubs and spas. The material is not adversely affected by humidity or pollution.

## CONSULTATION

We work hand in hand with architects, interior designers, hoteliers and private clients to provide exclusive and elegant design solutions supported by first class and dependable customer service.
